PROFESSIONAL SUMMARY

Oracle Fusion Solution Architect with **2+ years** of experience designing and developing enterprise-grade cloud applications on Oracle VBCS, OIC, and Oracle JET, with deep specialization across Oracle Fusion HCM, HRMS, Finance, and Supply Chain implementations. Proven track record of delivering scalable, high-performance solutions for global clients spanning the Middle East and Asia. Oracle Cloud and Google AI certified, with strong full-stack development capabilities and hands-on expertise in generative AI, AI voice agents, integration, and modern web technologies.

CERTIFICATIONS

- **Oracle Redwood Application 2025 Certified Developer** — Oracle Corporation (2025)
- **Oracle Cloud Infrastructure 2025 Application Integration Professional** — Oracle Corporation (2025)
- **Building AI Voice Agents** — FindSkill.ai (2026)
- **Google AI Essentials** — Great Learning / Google (2026)
- **Machine Learning Specialist – Advanced** — IBM (2024)
- **Deep Learning Essentials** — IBM (2022)

TECHNICAL EXPERTISE

Oracle Fusion Stack: VBCS, Oracle Integration Cloud (OIC), Oracle JET, PCS, VBS, ORDS, ODA

Oracle Cloud Modules: HCM (Core HR, Absence, Talent), Finance (GL, AP, AR, FA), Supply Chain, PPM

Integration & APIs: REST APIs, SOAP Web Services, OIC, JSON/XML, ORDS, Webhooks

Web Technologies: HTML5, CSS3, JavaScript (ES6+), React.js, Oracle JET Components, Responsive UI

Database & Backend: Oracle DB, SQL, PL/SQL, Python, Node.js, Stored Procedures, Packages

Cloud & DevOps: Oracle Cloud Infrastructure (OCI), Google Cloud, Azure, Git, CI/CD, Agile/Scrum

Generative AI & ML: AI Voice Agents (STT–LLM–TTS), Pipecat Orchestration, Prompt Engineering, LLM Integration, Google AI Studio, Gemini APIs, Azure function app.

PROFESSIONAL EXPERIENCE

Senior Associate Technical Consultant – Oracle Cloud

Jun 2024 – Present

4i Apps Cloud Solutions Provider

Chennai, India

- Architect and develop **enterprise Oracle Fusion applications** on VBCS with 100% adherence to the Oracle Redwood Design System, delivering scalable solutions across HCM, Finance, and Supply Chain modules.
- Built **5+ custom VBCS extensions** including smart search pages, dynamic forms, inline table editing, and self-service portals with advanced filtering and REST API integration.
- Designed and implemented **Oracle Integration Cloud (OIC) flows** connecting Fusion applications with third-party systems, achieving **99.9% uptime** while processing high-volume daily transactions.
- Optimized application performance by **35%** through efficient JavaScript action chains, page module functions, and Oracle JET component tuning.

- Collaborated with Oracle Fusion functional consultants to translate business requirements into technical specifications and production-ready code.

Applied Data Science Intern

SmartInternz

May 2023 – Jul 2023

Remote

- Developed machine learning models achieving **92% accuracy** for pose estimation and **87%** for sentiment analysis using Python, TensorFlow, and scikit-learn.
- Built automated ETL pipelines with Pandas and NumPy, reducing data processing time by **40%** for analytics.

KEY ORACLE FUSION PROJECTS

CCC – Enterprise Service Automation — *Oracle HCM*

- Architected a comprehensive VBCS portal for **5,000+ employees** with modules for business trip, budget management, document management, PPM, and reimbursement.
- Implemented smart approvals (PCS), multi-filter search, inline editing, and real-time notifications — reducing HR ticket volume by **60%**.

Nama Water Services – ERP Transformation — *Oracle HCM, SCM, Finance*

- Developed custom application modules for Petty Cash, Request Approval, Secured Payment, Tender Strategy, and House/Tanker Connection.
- Built VBCS integrations with external banking systems and payment gateways (Bank Muscat) processing **\$1M+ in transactions**.
- Implemented an error-handling framework with automated retry logic and email notifications, ensuring zero transaction loss.

Omran OTL – Custom Workforce Integration

- Created a real-time VBCS dashboard for tracking time and labor with advanced analytics and reporting.
- Designed the full backend — CRUD operations, REST APIs, ORDS, Packages, Procedures, Functions, security, and approval workflows for the custom OTL application.

AI & VOICE AGENT PROJECTS

Real-Time Conversational Voice Agent — *Pipecat • Google Gemini Live • STT–LLM–TTS*

- Engineered a production-grade **real-time voice agent locally** using the **Pipecat orchestration framework**, implementing both **Google Gemini native voice-to-voice** and a modular **STT – LLM – TTS pipeline** for end-to-end conversational AI.
- Designed **low-latency bidirectional audio streaming** with async frame processing, supporting natural interruptions, barge-in detection, and human-like turn-taking.

EDUCATION

Bachelor of Technology, Computer Science & Engineering

Vellore Institute of Technology (VIT)

2020 – 2024

Chennai, India | GPA: 8.01 / 10.0

ACHIEVEMENTS & LEADERSHIP

- Delivered **5+ enterprise Oracle Fusion projects** with 100% on-time deployment and zero critical production issues.
- **State & District Winner** — National Children's Science Congress (NCSC).
